PROJECTS:

- **Micro Project 1:**
Title : Line Following Medic Arm
Role : Group Member
Technology : Electronics
Period : July, 2018 – Nov, 2018
Description : Line following Medic arm is a device which works based on IR sensors and BO motors. The robot follows a predefined path, which is detected by using IR sensors and moves with the help of BO motors and the robotic arm picks up the objects and drops at the destination as per the remote controlled commands.
- **Micro Project 2:**
Title : Speed Detector For Highways
Role : Team leader
Technology : Internet Of Things
Period : July, 2019 – Nov, 2019
Description : The aim of this project is to develop an effective device to detect rash driving on highways and to alert the traffic authorities in case of any speed violation. The speed limit is set by the police who use the system depending upon the traffic at a specific location. If the vehicle crosses the speed limit, a buzzer sounds, alerting the police.
